RENAL FUNCTION TEST(RFT) PACKAGE

CREATININE - SERUM / PLASMA

0.94 mg/dL

0.6 - 1 mg/dL Normal

Info- Creatinine is a waste product formed when the muscles use a compound called creatine to produce energy for its activity. Creatinine is removed from the body by the kidneys. The level of creatinine in the blood reflects the efficient functioning of the kidneys.

POTASSIUM - SERUM / PLASMA

4 mmol/L

3.5 - 5.1 mmol/L Normal

Info- Potassium, a mineral is essential for the effective functioning of nerves and muscles. It is also required for the proper functioning of the Heart and maintains the body's acid base balance. Its level increases in kidney disorders.

SODIUM - SERUM / PLASMA

136 mmol/L

136 - 145 mmol/L Normal

Info- Sodium helps to maintain normal blood pressure, supports the function of the nerves and muscles, and regulates body's fluid balance.
